

Printing from Kubuntu 18

Version: 1.1

When printing from Kubuntu 18 each print job will need to be authenticated by the user after it is sent to the printer.

1. Print to printer “Student”.
2. Open “system-config-printer” by searching in the start menu or directly from a command console (ie, konsol or yakuake).
3. Right click on “Student” printer and select “View Print Queue”.
4. In the print queue under “Status” right click “Held for authentication”, and select “Authenticate”.
5. Enter password.
6. Swipe your student card at any Ricoh printer to print document.
